Abstract of the Invention

09590692

A method and system for reducing the time it takes for a trader to place  
a trade when electronically trading on an exchange, thus increasing the  
5 likelihood that the trader will have orders filled at desirable prices and  
quantities. The "Mercury" display and trading method of the present invention  
ensure fast and accurate execution of trades by displaying market depth on a  
vertical or horizontal plane, which fluctuates logically up or down, left or right  
across the plane as the market prices fluctuates. This allows the trader to trade  
10 quickly and efficiently.
